

# Trader Performance vs Market Sentiment – Advanced Analysis

This report extends the analysis from Notebook 1 by diving deeper into trader behaviour under different market sentiment classifications (Fear / Greed / Neutral). Key insights include: - Distribution of PnL varies significantly across sentiment types. - Some accounts consistently perform better under certain sentiment conditions. - Trade size correlates with extreme PnL values, especially during high Greed/Fear. - Daily PnL trends reveal sentiment-dependent volatility patterns.

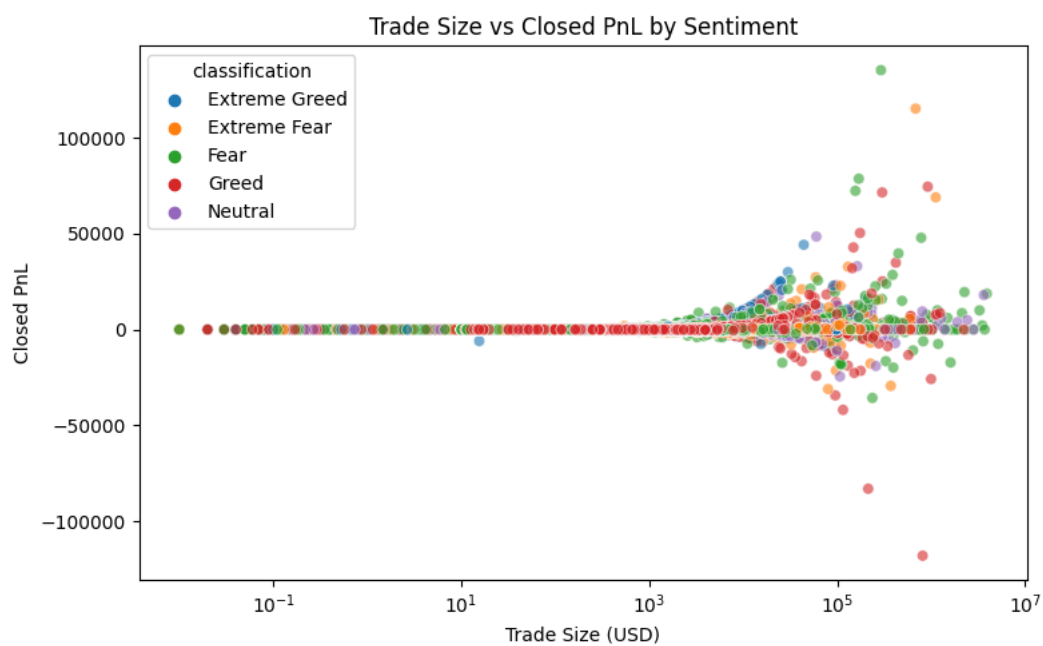

## ***PnL Distribution by Sentiment***

## ***Top 5 Accounts – Total PnL by Sentiment***
